### Facts

- Using electricity as its energy source, heat pumps are used for either the heating or cooling of your home by transferring heat between two reservoirs.
- In the warmer months, the heat pump acts like an air conditioner, removing heat from the air inside your home and transferring it outside.
- During colder months, heat from outdoor air is extracted and transferred to the interior of your home. Even a 32° F day produces enough heat to warm a home.

### Rebate Amounts

Central Air Conditioners		Air Source Heat Pumps	
SEER 14.5	\$50	SEER 14.5	\$480
SEER 15	\$50	SEER 15	\$580
SEER 16	\$50	SEER 16	\$630

\* Double rebate on ASHP if installed in June, July, or August
